You think water moves fast? You should see ice. It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. After the avalanche, it took us a week to climb out.[1]: No? Now, I don't know exactly when we turned on each other, but I know that seven of us survived the slide... and only five made it out. Now we took an oath, that I'm breaking now.~~We said we'd say it was the snow that killed the other two, but it wasn't.~~ Nature is lethal but it doesn't hold a candle to man. However unreal[2]: speaking of unreal... it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get sick [3]: Yes, sick., I do. That's also clear.

The lysine contingency - it's intended to prevent the spread of the animals is case they ever got off the island. Dr. Wu inserted a gene ~~taht~~^{that}^{Green} makes a ~~single~~^{Green} faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless ~~they're~~^{continually}^{Green} supplied with lysine by us, they'll slip into a coma and die. We're on the same curve, just on opposite ends. However unreal[Green 1]: speaking of unreal... it may seem, we are connected, you and I. You don't get ~~sick~~ [Green 2]: Yes, sick., I do. That's also clear^{Green}.

Changes by orange author with some comments

Now that we know who you are, I know who I am. I'm not a mistake![OA 1]: Yeah, I like animals better than people sometimes... It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? He's the exact opposite of the hero.[OA 2]: Especially dogs. Dogs are the best. And most times they're friends, like you and me!^{OA} I should've known way back when... You know why, David? They called me Mr Glass. However unreal[OA 3]: just nice it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get sick [OA 4]: Yes, sick., I do. That's also clear^{OA}.

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.* We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get sick, I do. That's also clear.
