

thread.h

```
graph LR; thread_h[thread.h] --> pthread_h[pthread.h]; thread_h --> unistd_h[unistd.h];
```

A diagram illustrating the relationship between the `thread.h` header file and other system headers. The `thread.h` header is shown in a black box on the left. Two blue arrows originate from its right side, pointing to two white boxes on the right: `pthread.h` (top) and `unistd.h` (bottom). This indicates that `thread.h` depends on or includes both `pthread.h` and `unistd.h`.
