You think water moves fast? **You should see ice.** It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. ~~After the avalanche, it took us a week to climb out.~~ — No? — Now, I don't know exactly **when** we turned on each other, but I know that seven of us survived the slide... and only five made it out. **Now we took an oath, that I'm breaking now.** ~~We said we'd say it was the snow that killed the other two, but it wasn't.~~ Nature is lethal but it doesn't hold a candle to man. However unreal— **speaking of unreal...** — it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get **sick** — **Yes, sick.** —, I do. That's also **clear**.

Changes by green author

The lysine contingency - it's intended to prevent the spread of the animals is case they ever got off the island. Dr. Wu inserted a gene ~~taht~~^{that}**Green** makes a ~~single~~^{single}**Green** faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless ~~they're~~^{continually}**Green** supplied with lysine by us, they'll slip into a coma and die. We're on the same curve, just on opposite ends. However unreal— **Green speaking of unreal...** — it may seem, we are connected, you and I. You don't get **sick** — **Green Yes, sick.** —, I do. That's also **clear**^{Green}.

Now that we know who you are, I know who I am. ~~I'm not a mistake!~~ — **OA** **Yeah, I like animals better than people sometimes...** — It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? ~~He's the exact opposite of the hero.~~ — **OA** Especially dogs. Dogs are the best. — ~~And most times they're friends, like you and me!~~^{OA} I should've known way back when... You know why, David? They called me Mr Glass. However unreal— **OA just nice** — it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get **sick** — **OA** **Yes, sick.** —, I do. That's also **clear**^{OA}.

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.* We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal it may seem, we are connected, you and I. We're on the

same curve, just on opposite ends. You don't get sick, I do. That's also clear.
